

# 小组名单(三个诸葛亮)

## YOUR TITLE HERE

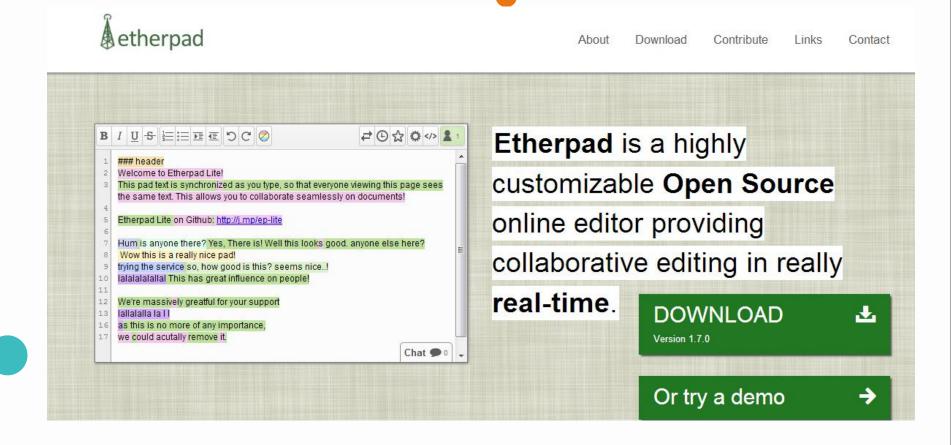

# 阿里云ECS和Etherpad

Etherpad 多人即时文档 协作平台 支持中文

开源

## 阿里云ECS

阿里云服务器 ECS。

扩展很方便: 开始内存500M, 部署过程中提醒 空间不足,升级 配置,交钱然后 重启。

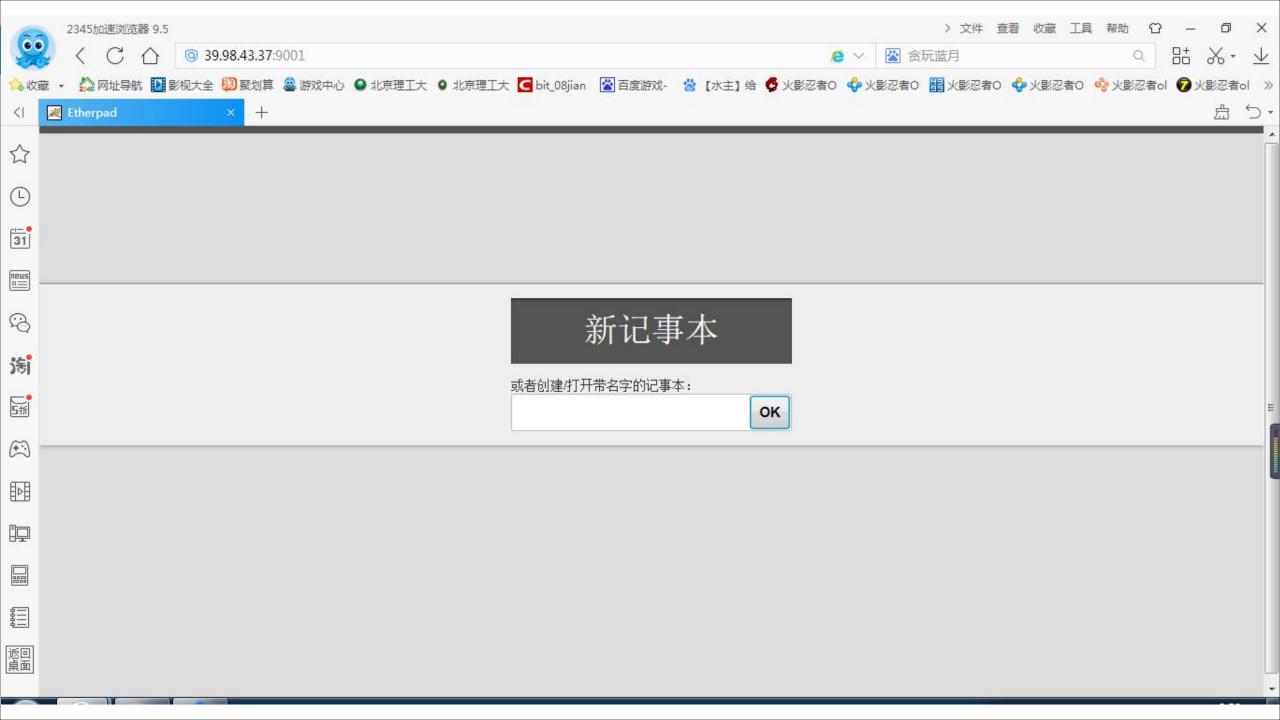

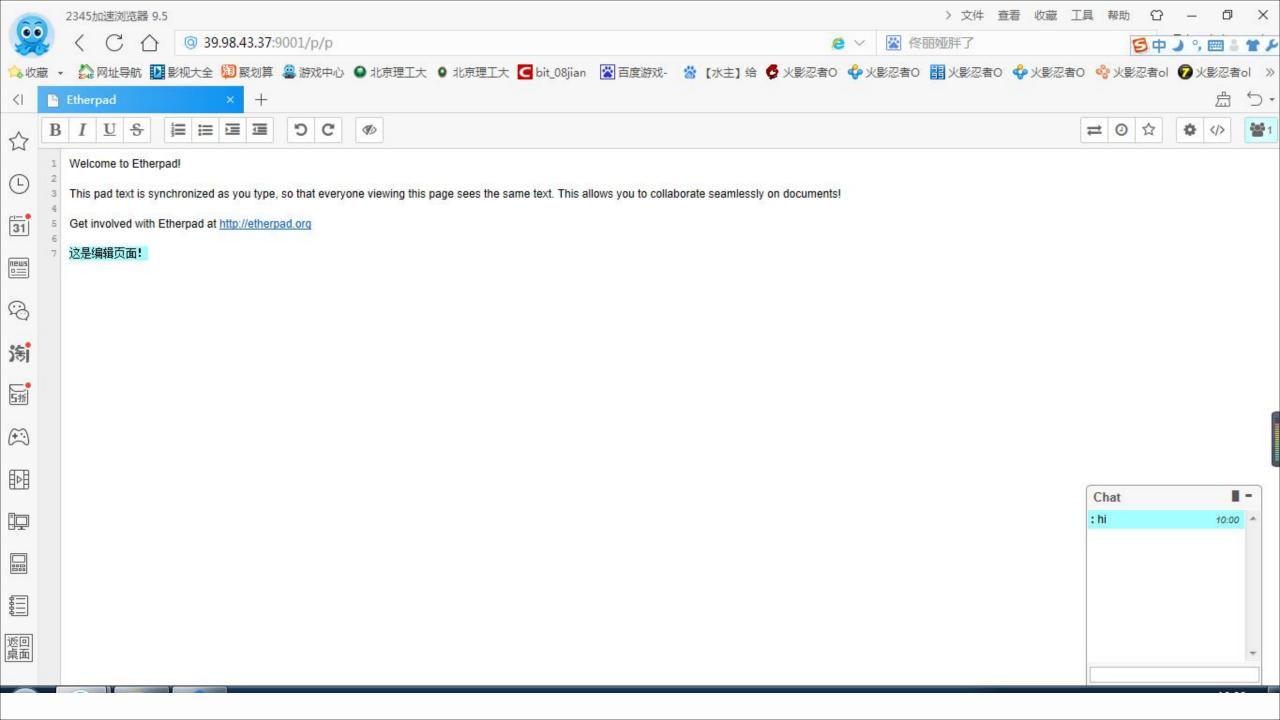

centos 7 mysql node.js

开启80与9001 端口 成功连接到实例i-8vb2ho275vacqa2xacxw。

39. 98. 43. 37: 9001

[etherpad@Jiang ~1\$ ~/etherpad-lite/bin/run.sh Ensure that all dependencies are up to date... If this is the first time you have run Etherpad please be patient. Clearing minified cache... # 性能测试PTS

性能测试服务(Performance Testing Service, 简称 PTS)是卓越的 SaaS 性能测试平台,具备强大的分布式压测能力,可模拟海量用户的真实业务场景

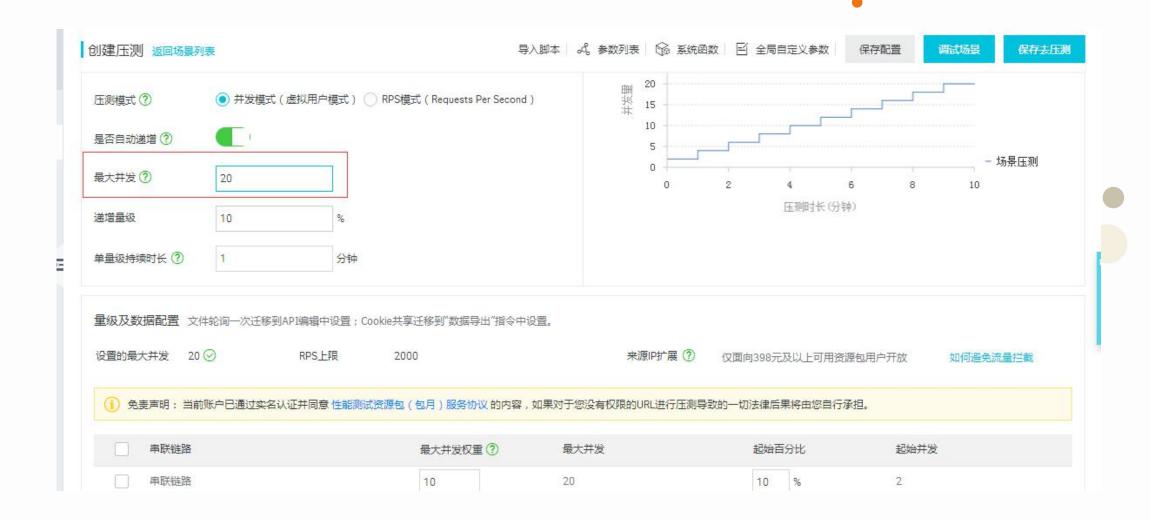

测试url:

http://39.98.4

3. 37:9001/p/20

18

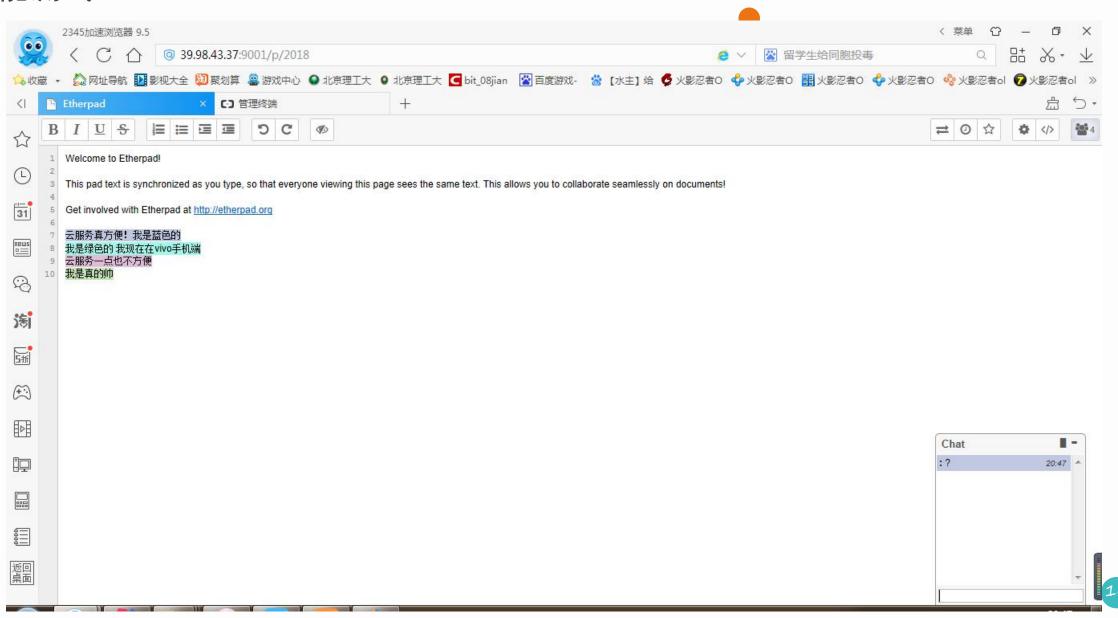

#### 测试报告

请求成功率: 90%

平均访问时间超过2s, 比较慢

## 功能测试

#### 功能测试

# 功能测试结果:

- 1. PC端和移动端都可以正常使用。
- 2. 下载到本地功能正常。
- 3. chat功能正常。
- 4. 后台记录正常。

# 其他问题

# etherpad:

- 1. 没有权限管理,无需注册。
- 2. 不能插入图片、表格。
- 3. 使用数据库。

(数据库里只用一张表,存路径,数据还是在 部署机器上)

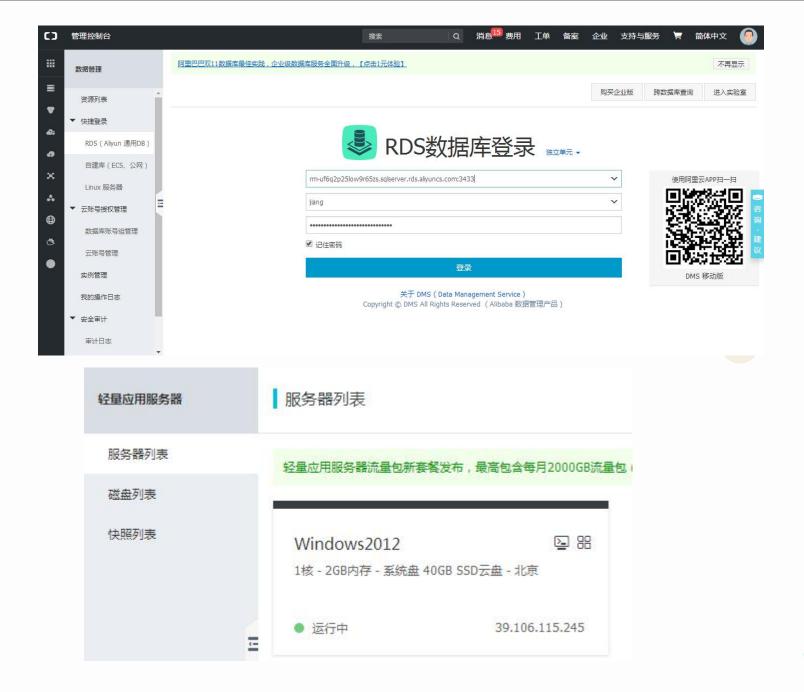

与石墨文档等协同编辑应用的区别: etherpad可以部署在私人服务器上,自己可以控制后台,别人无法访问数据库,适合内部团队使用。

简单demo:不希望把服务端和数据库放在一起,尝试使用远程数据库。

云数据库 (sqlserver)

轻量应用服务器 (windows)

轻量应用服务器与云服 务器ECS主要区别: 轻量应用服务器采用的 是SSD硬盘,同等配置 下读写性能要好一些。

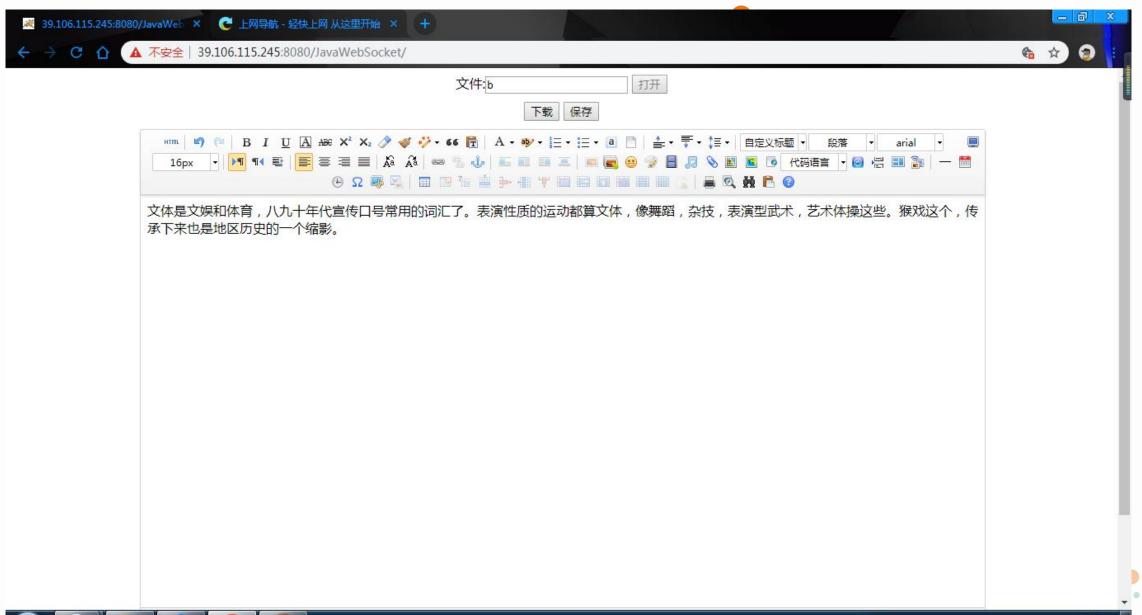

环境: tomcat

把demo的war包 放上去。

http://39.106.115.24 5:8080/JavaWebSocket 功能比较少,只有打开,编辑,保存和下载功能。

目的: 利用websocket, 百度 富文本编辑器和tomcat实现与 数据库远程交互。

Etherpad协同编辑器

云服务器ECS

简单demo

轻量应用服务器 云数据库RDS

云服务器7\*24小时开机。

不用在自己电脑上下载任何工具,环境。

云服务方便扩展-----交钱+重启。

除了服务器、数据库之外,阿里云还提供很多其他服务,比如性能测试PTS等,操作简单,容易上手。
